Prior to certification, trainers are assessed and scored based on their understanding and demonstrated skills.

The Aerial Lifts Train the Trainer Certification Program focuses on practical learning and as the best training provider in the industry, we provide top notch hands-on training. We give lots of opportunities to practice the techniques and concepts that are taught within the classroom. Along with hands-on experience, trainers develop general knowledge of machine theory and instructional techniques, field and classroom communication skills, and ability to effectively train and evaluate operators. Trainers would gain knowledge of what traits make a successful trainer.

The Aerial Lifts Train the Trainer Program likewise teaches the right methods required in order to express the right information inside the classroom and field setting. There are three aspects of machinery operation that the trainer should learn how to convey to operators: what to carry out; how to do it; and why it has to be carried out.

In the program, trainers would be provided with the latest, detailed reference material to better help them convey the information to equipment operators. The manuals utilized, contain detailed information on all aspects of industrial mobile machine operator training. Incorporated in the package are training aids that provide a visual reference in order to improve the learning experience. The equipment-specific training products include necessary materials for both the trainer and the operator: videos/DVD's, overhead transparencies, kinds of equipment, safety message posters; stability pyramids and digital training aids.
