

Port Coquitlam Boom Lift Training

Port Coquitlam Boom Lift Training - Aerial platforms or elevated work platforms are devices that allow workers to carry out duties and tasks at elevated heights which will not be otherwise reachable. There are various aerial lifts available to carry out different applications under various site conditions. If not carefully operated, elevated work platforms could lead to serious injury or fatality. The most common reasons for related accidents are electrocution, falls, tip-overs and crushed body parts. Lift operators should be fully trained in techniques in order to prevent accidents during the operation of lifts.

Aerial Lift Safety course is designed for those who should operate the devices more safely and effectively. The course provides thorough instruction on the most used lifting devices in the industry.. Kinds of lift covered consist of scissor, articulating and boom supported aerial lifts. The video presents the right procedures operators should follow. Instruction focuses on pre-operational inspection, protection against falls, stability of the device and safe driving procedures.

The program addresses employee safety and equipment reliability. All instructional materials are compliant with government, provincial and state agency requirements and regulations. Training methods and course management would be taught. The trainer will likewise know the technical aspects of aerial lift safety.

Parts of the Boom Lift Training course include both practical training and classroom training. Both sessions must be finished successfully for the participant to receive a certificate of achievement.

The self-propelled boom-supported elevating work platforms are different from the self-propelled elevating work platforms in that they are able to position their work platforms entirely beyond the base of the machine. The theoretical training part is virtually identical for both kinds. The practical training part can be completed more quickly if only one type of machinery is used.

Elevating Work Platform Training Program Objectives:

For the safe operation of Boom-Type Elevating Work Platforms and Self-Propelled Elevating Work Platforms, boom lift training would help operators utilize their machinery more effectively and will reduce the chances of workplace accidents. Trainees would review of business policies and applicable rules, discuss Due Diligence, study Criminal Negligence and consequences to trainers, employers, employees and supervisors. Participants will review equipment features, stability, operating procedures, parking and fueling/charging procedures. Site-specific safety problems will be addressed.
